LEAN SPRINT FACILITATION SERVICE

EXECUTE FASTER, AFFORDABLY AND FLAWLESSLY

LEAN SPRINT

Execute “faster, affordably and flawlessly.” Remove the delays and non-value-added tasks from your work processes and get closer to perfection. Traditional process improvement takes too long to master, costs too much, and often fail to deliver the expected outcomes. Our “**Lean Sprint**” approach will help you overcome the reluctance to improving your processes now. Our “Lean Sprint” concept is a very quick and affordable solution (1 to 2 -hour timebox) that maps one of your administrative/service processes and focus on eliminating delays and movement.

WHY THE FOCUS ON ADMINISTRATIVE/BACK OFFICE PROCESSES?

Over time every business process becomes increasingly complex. Exceptions, workarounds, and many instances of tampering render simple processes into complex, unmanageable monsters. This is especially true of back office and support processes. **Lean Sprint** can be applied to any business process. Anytime anything is produced or delivered from a haircut to a jet engine or making a cup of coffee. It may be a fast, affordable, flawless process or a sluggish, error prone, costly one, but it is still a process and our “**Lean Sprint**” intervention will streamline any process.

Wouldn't this be a good fit for your organization?
